J.F.

Y/E PREFACE.

To the Courteous Reader. LONDON.

Greeting

The Stream of Conquest has generally flowed from North to South. The Triumph progress of the Goddess Nicotina, has been from West to East. Starting in the 16th century she has now girdled our little orb with darters burning continuous incense. The Instruments connected therewith are objects of Historical & Ethnographical interest. Hence is brought together, of authentic Portraits of the "Pipe Family". Briar root and Branches. "As judged from the favor in which they are now held, "at home & abroad" they seem likely to flourish for ever. I cannot close without expressing my thanks to Mr. Bernard Quaritch for placing them before you in their present Garb:-

Your faithful Linner & Author.

A.D.

1890.

TOBACCO PLANTS

their Varieties.

Although Smoking is generally associated with Tobacco only, yet there are other plants, whose ..

leaves are used for similar purposes. These will be referred to as we come to the different means of using them. Our first Woodcut of Tobacco is from STELLA .. ROMA. 1669. a work of.

D. B

great value. as giving. Pipes. the Hookahs of Persia. as well as Plants. but we will start with some of the growths. now most generally known of the "NICOTIANA" Family which is very widely spread over the face of the Earth. that of late made great strides in Borneo & Sumatra.

NICOTIANA TABACUM". (The mother of the family)

Height 5 ft. Leaf. 12 to 14". Corolla Pink.
Virginia monella.

N. RUSTICA". Height 3 to 4 ft. Leaf. 10" to 12"

Corolla. Greenish into Yellow. Burkey India.

N. REPANDA". Small. Corolla white. Havannah.

N. PERSICA". - or Bombak. all used in Persia.

by the Royal Family. (SHIRAZ tobacco).

N. AFFINIS" is our Garden Plant with long tube $3\frac{1}{2}$ " with Corolla white & very fragrant. Habitat. Isle of Pines S. PACIFIC.

NICOTIANA

FRAGRANS

WHITE.

N. TABACUM.

PINK.

We are greatly indebted to old German woodcuts for solid information and details of habits & customs of the 16th century. which our own people have not handed down to us. take for instance "Hans Sachs." Book of Trades. Had smoking been in vogue. in his day he would have given it - or rather Iost Ammon. would have illustrated it so here in 1616 .A.D. we find a sturdy German, blowing a tremendous cloud. It is taken from an old work. now in Frankfurt - viz

Pipes.

I have heard much of late of
 the "STONE" Period. The "Bronze"
 Period and the "Iron" Period of some
 one has gone so far as to say
 this is the "Brass" Period.

on all these scores. "SMOKIANA" is strongly
 represented. bringing forward. The "Brass"
 Pipes of SUMATRA. This surprising how
 widely diffused is "STONE" especially Soap-
 stone. "amongst the following specimens
 will be found. our "Gourd" Period. - but
 as there is "no place like Home" we will begin
 with "English Clays" of which some are
 shown on the opposite page, enriched by
 30 years of habitant years. -

and old London. as revealed in digging
 old foundations. has yielded a great
 harvest of Pipe. produce. The museum
 at Guildhall. has a very good collection.
 The "Churchwarden" Clay was the Pipe
 of the early part of this century. & is still
 in the Country. It was considered right
 always to have a clean pipe. hence they
 were stacked together in a double row &
 sent to "The Bake-house". for Purification.
 The "Irish Dundee". originated the pipe
 "old clay". most probably. the Scots
 followed with Cutties. & the French
 with "Fiolets". "bien Culottées" - or
 "Forty years ago". Milo in the Strand.
 was the man for "Coloured Clays".
 which he made his speciality.

DUTCH GEAR.

Full size.

GERMANY.

As a Nation of Smokers. The Germans have always carried the palm. & do still. & with them Smoke & Song were ever inseparable. Imagine a German Student without his Pipe. & his Corps Cap. we should not know him. The leading feature in German Pipes is decidedly The long Bowl of Porcelain. generally adorned with some Beauty on the front of it. in medallion form. The stems are of great length. some four feet. or so with flexible tubing. leading up to the mouth piece. These may be considered House Pipes. for travelling. naturally they are shorter. The Tobacco Bags. are objects of great care & interest.

GERMAN

NORTH EUROPE.

The Island of "AMAGER" near Copenhagen. has retained its costumes + customs. so faithfully. that we have confidence in the Pattern Pipes. which are now still in use. The long one. 4 ft 8 in is the House. the shorter one 6 in in the bowl. contains the allowance of 30 tobacco for the day. This is the constant companion of the out door worker.

In Norway. small blocks of Mærschaum. seem to be most in vogue.

The Hungarian Pipes are of red clay. + show Asiatic influence in form.

The Bygdeslæ Pipes look very workman like. mostly of wood. with Roebuck horn. introduced as ornament - .

DANISH.

ARMAGER
ISLAND.

AMAGER.

NORWAY.

ALGERIA.

We are now in a new sphere of Pipe.

Sand: a kind of slack water between European + Asiatic systems - in which the Turkish type predominates. Thus the upper Red clay bowl on the opposite page is quite Turkish. The handsome Arab Pipe. of a form seen often smoked riding on a Camel. shows us how decoration will now be introduced in a new form. The Stem of this Pipe is beautiful in Colour. the Ivory. having a very beautiful arabesque pattern upon it. the red colour of which. harmonizes. delightfully with the dark wood bowl. The Large bowl is decidedly for House or Tent service.

ALGERIA.

AFRICA.

Everywhere in the Dark Continent the habit of smoking something or somehow has been met with by our most energetic Explorers. even in the dense forests of new Equatoria. The Pigmies find it desirable to have something to smoke. Paul Du Chaillu. in 1856. brought to our notice the Pipes shown at the top of the next page. These are used by the Fans. a fierce Cannibal. tribe. great in the mystery of Iron work. and are generally made of red or very dark clay. The specimen from SANKURU. River. LAT 5° S is of wood very beautifully carved. - The Bone Pipe is very like a Cigar Holder

LAGOS and Ashantee.

The 3 free Bowls of the dark clay bowl. are certainly a striking object to any smoker.. and again. the small bowl. from the larger one. in fact. "Bowl major" "Bowl minor" - this plurality we shall find in India. still that does not very clearly explain the why + wherefore - unless it emanates from mere love of being unlike others.. The Light coloured Red Clay of the Ashantee Pipes is very striking - the form of the Bowls still more so. There is a decidedly Classical character about them.. as if started from Roman Lamps. + Pompeian ideas. + then supplied to their Colonies -.

AFRICA.

The recent explorations in Africa have developed our geographical knowledge so much. that a very special interest is imparted to many of these specimens by giving carefully the situations from which they have been procured - Thus. The Ivory pipe of King MTESA. from UGANDA. Victoria Nyanza. is from a new country. the ornamentation very refined & delicate. next the long one & ft. presented by the Khedive to the British Museum. is from the MONBUTTOO tribe N.W. of the ALBERT NYANZA. The smaller one is from the SHIRÉ River. near the Murchison Falls. & used for Wild Hemp by the Manganya people.

AFRICA

Zanzibar. at the present moment is a centre of public interest. and the example given on the next page - is an exceedingly good one. it is of carved wood. has much of the ARAB character in its form.

The large one is of wood also. with good ornamentation. the Bowl is 4" in diam and the total length 12". This is used for smoking. Wild Hemp. or Bang- and sometimes. known as "LIAMBA". - it is from NYASSA. LAT 9° S. LONG. 31° E. This is a pipe of mixed features. as the arrangement is strongly allied to the Bushman on the next page. it is however from N.W. of Victoria Nyanza. UGANDA. NYASSA LAND. The Bowl is of dark clay. with a gourd body. HABITAT. doubtful.

LIAMBA. or Wild Lamp. CANNED. INDICA.

BANG. or BANGUE. SMOKING.

BUSHMEN · S. AFRICA.

Now we arrive at the full swing of the Stone Bowls of Soap stone or "STEATITE" and the link with the East "UGANDA Pipe" will at once be recognized. The whole in actual is most cumbersome. The size therefore - The Horn being some 18ⁱⁿ must make it bad for Bushwork. although the tube can be unshipped most readily. The Stone Bowls are carved with great care. The favorite form reminds us of the mace, or "Marteau de Fer" used in the real Iron Period. - Here is found also the Duplex Bowl. also in Steatite.

Bushman. S. AFRICA

STEATITE
BOWLS.

STONE
BOWLS

SOUTH AFRICA.

The "Steatite" Bowls now show decidedly European influence. altho the most striking feature is the under disc. which is probably added to give strength. as the Steatite itself is very friable. its form reminds one of the inverted comb on the Skull of a Gorilla. which is very African. These specimens like many others. are from that Great Store House of information The British Museum. which happily secured many of the interesting ^{specimens} collected by the late Mr. Bragg. F.S.A. We can but regret that so complete a collection should ever have been dispersed - "Sec transit".

SOAP Stone Pipes. S. AFRICA.

TURKEY

Turkish tobacco is such a familiar term. so comprehensive in its light varieties. that Turkish pipes must at once be called "CHIBOUQUES." + HOOAH'S.

The red clay bowl. of the former. is generally 2 in. in diameter. The stem. of Cherry. or of Jasmine. 5 ft long. when the bowl is formed. it is covered with thin paper. + prepared for lighting.

The Smoker. at a range of 5 ft gives the signal - the light is applied -

The mouth piece of clouded amber. is very rounded + therefore only peck to the lips. The Red clay Hand Jubble of Benares is very simple.

— "HOOKAH." —

STELLA. of ROME. here is again useful to show us the "Hookah" of Persia in his day. his book was published. 1669. and as travelling from TEHERAN to the HOLY CITY. was less rapid than now. adays. we may fairly accept this illustration as representing a well-established object. The action of the "Hookah" or "bubble bubble". is to draw the smoke through the water - also cool & purify the fumes of the Tobacco. Being made of Glass. This is called a "SHISHEH" & in it is smoked. the Persian "TOMBAK". exclusively grown at CHIRAZ. is the best. & consumed by the members of the Imperial family.

PERSIAN.

SCINDE.

This is one of the Giants of the Red
 ware Race in India. 15 inches in height
 and is used in this North West Province
 as a Village welcome to travellers &
 is generally found in the DAK Bungalow.
 In some parts of India, a native
 may be seen, with his Public "Hookah",
 all alight ready for the passer-by, to
 take a few whiffs - on paying a "consi-
 deration" for the privilege, refreshment.
 The lower form, was given to the
 writer by Dr. Watts. it is used by the
 Hill Tribes of "CHITTAGONG": & was
 brought over here for the Colonial Exhi-
 bition in 1886.

MADRAS

As we are now leaving the "HOOKAH" family + coming to the "NARGHILES" it will be well to emphasize the distinction between the two - which is this - "NARGHILE" is the native term for Cocoa nut. Hence all smoking mediums of that kind. such as must be laid down + will not stand erect. are called "NARGHILE" especially if Cocoa nut shape. All "hookahs" stand by themselves. This bowl from N. Arcot MADRAS. is made of a Bronzed Ware. somewhat heavy. but good form. The Five topped Chillum. is only seen in the Bazaars. not in general use.

NEW GUINEA.

Bamboo is the material now in vogue, and the mouth piece is cunningly arranged by making a small hole at the joint for the draught bore. The Tobacco tube which cannot be called a bowl, but rather a cigar or cigarette holder, is always at right angles to the thick stem, which averages $14\frac{1}{2}$ to $15\frac{1}{2}$ in length. The ornamentation like that of "CHINAM" cases, is very delicate & refined. The South Pacific affords us a shell pipe, and from SAVO & the SOLOMON ISLANDS, we have a very simple contribution. One would have expected colour from them, certainly as well as from New Guinea.

+ Paraguay River.

The Spaniards influence in South America has not been likely to contribute to the development of Pipe smoking. but we find native specimens of considerable interest beginning from the South in Magellan Straits. The Patagonians use the small short form which was in Mr. Bragg's collection. above that is quite a new feature a square pipe of 13" in. length used on Great State occasions - the sides ornamented with a key pattern + steps as on HUACA POTtery in Peru. The large Bowl with small bone mouth piece is from River UCAYALI - Peru. + Fish tail of wood is from MATACO Indians. GRAN CHACA

NORTH AMERICA.

We have now come round to the original home of Tobacco & Smoking: to the Land of the "CALUMET of PEACE." & the "TOMAHAWK PIPE." & where Sir John Hawkins & Raleigh. Drake first saw the "Weed" in use. The despisers of the "Weed" may chuckle. may they hear the old Proverb. "that ill Weeds grow apace." for it has grown & must be very infectious. nor is there any falling off. for "Steamers" go. & there the Goddess NICOTINA. will surely take root. such is the experience up to the present time -

CATLIN'S COLL.

N. AMERICA.

There is hardly room to do justice to a good North American "Pipe of Peace" on these small pages. but those who are really interested in the Pipe customs. Functions of the Indian tribes will derive much pleasure & information too from consulting "CATLIN's" works on those subjects. The best pipes have flat stems. much ornamented. the Bowls of elaborate design are very quaint & original. the simpler ones are red. the more curious in a dark slate. + a kind of green stone. The British museum has naturally a very fine collection of all the varieties of both materials -.

Flat stems for Pipes.

N. AMERICA

The Indian graves have supplied specimens of very great antiquity from all parts of N. America. and a fine collection of MOUND PIPES. was presented some years ago to the City of Salisbury. Those on the opposite page will give a general idea of the character of these real antiquities. in which the bird is a prominent object. probably some sacred bird. in vogue amongst the tribe at the time they were made. but we must not surmise. "FACTA" "non Verba" is true ARCHAEOLOGY.

N. AMERICA:

Stone pipes still predominate.

The upper one from South. Caro-
lina. has a new form with a cut-
water or fore-foot. suggestive that
it should be held by that part.
when being smoked.

The "Nootka Sound" example is an
other variety. & to our modern eye wd.
appear to have been designed by a
carpenter. still the bowl itself
carries a decidedly modern impress.
The modern N. American pipes are
most carved in slate. and some are
quite professional in design and
lengths -

ARCTIC PIPES

 & LAPLAND.

In this part of the world there is not much material for the making of Pipes - for the only wood is generally brought up by the kindly Gulf Stream from the West Indies - even to NOVA ZEMBLA. Still the sparse Inhabitants fall back on the roots of the Walrus "Very comely looking pipes are the result. The Laplanders pipe is generally made of this iron - which may be accounted for by the proximity of the once very famous "SWEDISH" Iron.

IGNITION.

BORNEO.

After the Tobacco; the Pipes, very naturally occurs the Question as to getting a Light. The friction of Two dry pieces of Wood, is the most primitive method. still in vogue where modern methods are still unknown. and the light "HIBISCUS" wood is the easiest of all. to obtain fire from but in BORNEO. The Dyaks of the KYAN tribe are most scientific. they produced it by compressed air. & do still. & we only know of two other places. SUMATRA & the North of BURMAH. where this method is known & in use.

"MACHEROS"

FLINT + STEEL.

Doubtless. The Spaniards carried with ^{them}
 all through their conquests of S. AMERICA
 their "MACHEROS", which is a tube to
 carry the matches. To the tube is generally
 attached a chain leading to a hook
 which the top pulls out with the
 matches for the purpose of lighting
 with the flint & steel. Some 50
 years ago the Peruvian & Chilean
 Ladies worked very beautiful matches
 with lace let in. Some MACHE-
 ROS were of Gold. some of Sil-
 ver. In India they are larger
 and are called. "RAMASWAMI".
